

Hello!

I am a spyware software developer.
Your account has been hacked by me
in the fall of 2019.

The hacking was carried out using a hardware vulnerability
through which you went online.

I went around the security system in the router,
installed an exploit there.
When you went online, my exploit downloaded my
malicious code (rootkit) to your device.
This is driver software, I constantly updated it,
so your antivirus is silent all time.

Since then I have been following you (I can connect to
your device via the VNC protocol).
That is, I can see absolutely everything that you do,
view and download your files and any data to yourself.
I also have access to the camera on your device,
and I periodically take photos and videos with you.

At the moment, I have harvested a solid dirt... on you...
I saved all your email and chats from your messengers.
I also saved the entire history of the sites you visit.

I note that it is useless to change the passwords.
My malware update passwords from your accounts every times.

I know what you like hard funs (adult sites).
Oh, yes .. I'm know your secret life, which you are
hiding from everyone.
Oh my God, what are your like... I saw THIS ...
Oh, you dirty naughty person ... :)

I took photos and videos of your most passionate
funs with adult content, and synchronized them in real
time with the image of your camera.
Believe it turned out very high quality!

So, to the business!
I'm sure you don't want to show these files
and visiting history to all your contacts.

Transfer \$784 to my Bitcoin
cryptocurrency wallet: 12imBoD6qRw46tXR65ccJFSrPCwAR36T34
Just copy and paste the wallet number when transferring.
If you do not know how to do this - ask Google.

My system automatically recognizes the transfer.
As soon as the specified amount is received,
all your data will be destroyed from my server,
and the rootkit will be automatically

removed from your system.

Do not worry, I really will delete everything, since I am 'working' with many people who have fallen into your position. You will only have to inform your provider about the vulnerabilities in the router so that other hackers will not use it.

You have 72 hours (3 days) to send the payment. When coins are submitted, the video with you doing... you know what will be destroyed, and you will never hear from me. P.S. If you need more time to pay, open your notepad on your device and write '48h more'. Only this way you can contact me. I have a notice reading this letter, and the timer will work when you see this letter. Filing a complaint somewhere does not make sense because this email cannot be tracked like my bitcoin address. I do not make any mistakes.

I advise you to remain prudent and not engage in nonsense (all files on my server).

Good luck!
